Description

Renovated energy-efficient detached villa

Recently renovated (completion November 2023) designed to the most modern standards of energy efficiency and comfort. The home is fully electric and nearly self-sufficient thanks to a photovoltaic system with 34 panels (approximately 13 kW), ensuring extremely low running costs. Thermal insulation, underfloor heating, and an integrated home automation system for smart home management are also included.

On the lower floor, with a separate entrance, lies a spacious and welcoming living area consisting of a large living room with a kitchen area, ideal for socializing and hosting guests. Also on the same level are a billiards room, two bathrooms, and an internal staircase leading directly to the upper floor.

The sleeping area includes three spacious bedrooms, each with a private bathroom and walk-in closet, as well as a convenient dedicated laundry room, ensuring privacy and high-level comfort for the entire family.

The property includes a spacious cellar, two electric car charging stations, and approximately 3,000 square meters of land (approximately 2,000 square meters of flat land surrounding the house and 1,000 square meters of land below) with the possibility of building a swimming pool.

A modern, efficient solution, ideal for those seeking independence, technology, and spaciousness.
